

Second Regulatory event by ICMIF AMICE, 4 December 2018, Covéa, Paris

Revisiting Insurance Regulation and Supervision: is there an optimal model: the stakeholders' views

Image used courtesy of Poly.

Discussions will address the differences in insurance regulation and supervision which still exist in spite of the G20 mandate that the IAIS should propose global prudential and financial conduct requirements. Topics will also include the importance of maintaining a diverse global insurance sector and the need for an alleviation of regulatory requirements; an evaluation of the prudential regime Solvency II in Europe and beyond; IFRS 17 (accounting principle for insurance contracts); emerging risks and 'new', undocumented risks, such as the care dependency risk. There will also be feedback from the G20 insurance meetings.

The event will be conducted in English with French interpretation available.

Registration will open soon.
