AMICE SII Q&A helpline

Considering all these factors, the complexity of the regulatory framework is evident. AMICE worked to ensure that regulatory changes were fit-for-purpose and proportionate, advocating on behalf of the sector and promoting the cooperative insurance model. Collaboration with partners such as the European Parliament, European Commission, and ICMIF further strengthened AMICE’s position and influence. The organization’s achievements in 2017, including 573 participations in meetings/events and 59% communications, reflect its commitment to knowledge sharing, best practice, and contributing to members’ success.
